Texas Water Development Board
ATTN: FIF Abridged Application
P.O. Box 13231
Austin, Texas 78711

Re: FIF Abridged Application: Upper San Jacinto River Basin Regional Sedimentation Study

Dear Mr. Entsminger:

The San Jacinto River Authority thanks the Texas Water Development Board (TWDB) for the opportunity to submit an abridged application for funding via the recently created Flood Infrastructure Fund. Attached please find the abridged application for Upper San Jacinto River Basin Regional Sedimentation Study with the following attachments:

1. Attachment A: Project Benefit Area
2. Attachment B: Census/ SVI Data and Calculations
3. Attachment C: Grant Percentage Calculator Spreadsheet
4. Attachment D: Disaster Declarations for Hurricane Harvey and Tropical Storm Imelda
5. Attachment E: NFIP Certifications from Liberty County, Waller County, Grimes County, San Jacinto County, Harris County, Montgomery County, City of Conroe, and City of Houston
6. Attachment F: San Jacinto Regional Watershed Master Drainage Plan Project Fact Sheet
7. Attachment G: Upper San Jacinto River Watershed (Basin) Map

We appreciate your review and consideration of this application, and look forward to working with TWDB as a regional partner on efforts to reduce flood risks within the San Jacinto River Basin.

If you have any questions or require further documentation or data, please contact me at (936)-588-7177 or Matt Barrett at mbarrett@sjra.net.

Sincerely,

Matt Barrett, P.E.
Division Engineer

PROJECT INFORMATION

Project Name	Upper San Jacinto River Basin Regional Sedimentation Study		
Amount Requested from TWDB	\$375,000 (50% grant based on attached calculations (Attachment C))		
Financing from Federal Sources	\$0		
(if receiving federal funds, include the federal agency and program)	N/A		
Financing from Other Sources	\$375,000 (local match for remaining 50% not covered by grant)		
Total Project Cost (Check here if requesting loan funds only <input type="checkbox"/>)	\$750,000		
Category Applied For			
<input checked="" type="checkbox"/> Category 1 Flood Protection Planning for Watersheds See item (G) in Description of Proposed Project for explanation.	<input type="checkbox"/> Category 2 Planning, Acquisition, and Design, Construction / Rehabilitation (All combinations)	<input type="checkbox"/> Category 3 Federal Award Matching Funds	<input type="checkbox"/> Category 4 Measures immediately effective in protecting life and property

MINIMUM STANDARDS

Only projects that satisfy all minimum standards will be included in the prioritization.	<input checked="" type="checkbox"/>	1. For applicable projects, the benefit-cost ratio of the proposed project is >1.0 or an explanation is provided. N/A for study/non-construction projects per Intended Use Plan.
	<input checked="" type="checkbox"/>	2. For applicable projects, a proposed MOU and a project description was provided to all eligible political subdivisions and the list of political subdivisions that received this information is attached to the abridged application. N/A for Category 1 projects per Intended Use Plan.
	<input checked="" type="checkbox"/>	3. The applicant has acted cooperatively with other political subdivisions to address flood control needs in the area in which the eligible political subdivisions are located; and all eligible political subdivisions substantially affected by the proposed flood project have participated in the process of developing the proposed flood project. Requested input from multiple entities during the development of this project. See item (F) in <u>Description of Proposed Project for explanation.</u>
	<input checked="" type="checkbox"/>	4. The funding request does not include redundant funding for activities already performed and/or funded through another source.
	<input checked="" type="checkbox"/>	5. a. The area to be served by the proposed project has floodplain ordinances in place and is currently enforcing floodplain management standards at least equivalent to National Flood Insurance Program (NFIP) minimum standards. See Attachment E. OR
	<input type="checkbox"/>	5. b. Requesting funds to fulfill additional requirements for participation in the National Flood Insurance Program. N/A
	<input checked="" type="checkbox"/>	6. The proposed project was developed using the best and most recent available data. See item (A) in <u>Description of Proposed Project for explanation.</u>
	<input checked="" type="checkbox"/>	7. a. (Construction applicants only) Operations and maintenance costs associated with proposed facilities have been considered. N/A
	<input checked="" type="checkbox"/>	7. b. (Construction applicants only) Floodwater capture techniques have been considered. N/A, but see item (D) in <u>Description of Proposed Project.</u>

DESCRIPTION OF PROPOSED PROJECT

The purpose of this project is to perform a regional sedimentation study of the Upper San Jacinto River Basin (Lake Houston watershed). Sedimentation in the Upper San Jacinto River Basin has been well documented, and is known to impact floodway conveyance capacity. In order to identify and create a plan for implementing potential sedimentation solutions, this study will develop "sediment budgets" by evaluating the input, output, and storage of sediment for the entire basin, as well as for sub-watersheds within the basin. This process will identify which sub-watersheds in the basin produce the most sediment and which store the most sediment. With this information, sub-watersheds and individual locations can be prioritized for improvements, and conceptual solutions (potential future projects/efforts with the goal of reducing sediment inputs and/or enhancing sediment storage to mitigate the loss of floodway conveyance), as well as non-construction best management practices, can be developed and analyzed. For project/construction solutions, these efforts will include development of cost estimates, preliminary exhibits, and preliminary permitting requirement evaluation. All identified projects, efforts, and practices will be ranked and included in an implementation plan, and ultimately all information developed as part of this project will be compiled into a regional sediment management plan which can guide sedimentation mitigation efforts in the future. Specific tasks anticipated to be included in the scope of work for the project include, but are not necessarily limited to:

1. Upper San Jacinto River Basin watershed characterization
2. Inventory of available existing data
3. Annual sediment output determination
4. Annual sediment storage determination
5. Sediment transport modeling
6. Individual sediment source or storage locations determination
7. Individual site investigations
8. Key stakeholder and permitting agency coordination
9. Development of conceptual solutions and overall implementation strategy
10. Development of Upper San Jacinto River Basin sediment management plan

- A) The project will be performed utilizing the most recent/best available data, technology, and techniques available to SJRA. The project will take advantage of any relevant data, models, etc. developed recently as part of the, in progress and nearing completion, San Jacinto Regional Watershed Master Drainage Plan project (SJRWMDP) being performed by Harris County Flood Control District (HCFCD), which is utilizing Atlas 14 rainfall. The SJRWMDP is a \$2.7 million comprehensive regional study funded 25% by local partners HCFCD, SJRA, Montgomery County, and the City of Houston, and 75% by FEMA, conveyed through the Texas Division of Emergency Management. See Attachment F for more information on the SJRWMDP. The project will also utilize data from and build upon efforts by the U.S. Army Corps of Engineers (USACE) and Harris County to dredge accumulated sediment from the mouth of Lake Houston. To date, over 2.3 million cubic yards of material have been removed by USACE, at a cost of over \$90 million, partially funded by FEMA. An additional \$30 million has been dedicated to Harris County from the Texas Water Development Board to further dredging efforts via Senate Bill 500 from the 86th Texas Legislative Session. By utilizing data from and building upon the SJRWMDP and Lake Houston dredging efforts, the proposed project will increase the benefits gained from the large state and federal investments made for these projects. Finally, the project will use any relevant data from a sand trap development project currently being performed by SJRA, in coordination with HCFCD, along the West and East Forks of the San Jacinto River, which utilizes abilities provided to SJRA and HCFCD by House Bill 1824 from the 86th Texas Legislature, as well as any other relevant data from past studies and efforts in the region. Some of the efforts described above have already been performed along the East and West Forks of the river as part of the sand trap development project, and will not need to be duplicated as part of this project. A separate abridged application is being submitted by SJRA for the next phase of the sand trap development project (San Jacinto River Sand Trap Development Preliminary Design).
- B) For the purposes of SVI and AMHI and other census bureau data calculations, the project benefit area was considered as any census block group within or "more than minimally" overlapping (i.e. approximately more than 10% overlapping) the boundaries of the Upper San Jacinto River Basin (Lake Houston watershed), as the goal of the project is to analyze sedimentation within the entire basin. See Attachment A for project benefit area map, and Attachment G for a map of the Upper San Jacinto River Basin. Direct benefit areas for any individual future projects, efforts, or practices resulting from or using data developed as part of this project would be determined as those projects/efforts/practices are developed.
- C) It is anticipated that this study can be completed within 48 months, as indicated in the Prioritization Criteria section below. The duration of the study is anticipated to be significantly shorter than 48 months (18 months or less), but there is expected to be a delay in starting the study due to the need to allow for short-term budgeting uncertainties related to COVID-19 to be resolved. This delay will also allow for results of SJRA's San Jacinto River Sand Trap Development pilot project (preliminary design for that project submitted as a separate FIF abridged application) to be obtained and used as input in this study.
- D) While this application is for planning/study efforts only, the main goal of the study is to identify sedimentation solutions in the region and provide data and guidance for future sedimentation reduction projects, efforts, and practices. Any sedimentation reduction activity in the Upper San Jacinto River Basin (Lake Houston watershed) is anticipated to achieve some level of reduction of sediment load entering Lake Houston, which would in turn reduce storage reduction in the lake, which is the major water supply reservoir for the City of Houston and surrounding communities.

- E) As a study with the goal of identifying sedimentation solutions, the level of flood mitigation to be provided by those solutions is not quantified at this time. One of the goals of any sedimentation reduction project, effort, or practice resulting or using data from this study would be to restore, maintain, or expand storm flow capacity, which could potentially remove structures from the floodplain. Flood mitigation provided by these future projects/efforts/practices could benefit areas impacted by Hurricane Harvey and Tropical Storm Imelda (See Attachment D), as well as other recent and historical storms, potentially including, but not necessarily limited to, Hurricanes Ike and Rita and storms in 1994, 1998, 2015, and 2016.
- F) The San Jacinto River Authority (SJRA) Flood Management Division is focused on creating and sustaining regional flood management partnerships and coordinating with stakeholders to provide regional flood mitigation solutions within the San Jacinto River Basin. Created in 2018 in response to Governor Abbott calling on SJRA to become more involved with regional flood management, the Division has acted cooperatively with various political subdivisions throughout the region to address flood control/mitigation needs within the jurisdictional area of SJRA, and is now leading efforts with other entities to submit multiple abridged FIF funding applications for projects which span the Upper San Jacinto River Basin (Lake Houston watershed). For this specific application, SJRA coordinated with HCFCD and the City of Houston/Coastal Water Authority. HCFCD is a technical partner on SJRA's separate sand trap development project, referenced in item (A) above, from which relevant data and findings will be utilized by this project.
- G) This project is being submitted as a Category 1 project as it is for the purpose of providing evaluation of, and identification of solutions in response to, sedimentation issues across the entire Upper San Jacinto River Basin (Lake Houston watershed), which is larger than a HUC-10 watershed and in fact fully encompasses multiple HUC-10 watersheds. See Attachment G for a map of the Upper San Jacinto River Basin.

INFORMATION FOR GRANT FUNDING

Provide information for the applicable level of grant funding:

Category 1:

Study area AMHI (weighted average based on population)-\$88,437.90

(Optional – attached a copy of federal disaster declaration – flood related within the last 60 months) **See Attachment D**

~~Categories 2, 3, and 4 N/A~~

- ~~➤ For consideration of being outside MSA: Project is entirely located outside of an MSA - Yes ___ or No ___~~
- ~~➤ Project area AMHI (weighted average based on population)-\$_____~~
- ~~➤ Project area Unemployment Rate (weighted average based on population)-_____%~~
- ~~➤ Project area Population Decline (if any) (based on sum of the population in the project areas)-_____%~~
- ~~➤ For consideration of being an Rural Applicant: All entities within the project benefit area are outside MSAs and have populations <10,000; or the applicant is a district or municipality with a service area of 10,000 or less in population; or located in a county in which no urban area exceeds 50,000 in population - Yes ___ or No ___~~
- ~~➤ For consideration of being a Green or Nature-Based project: Percentage of total project costs that are considered green or nature-based- _____% (attach the calculation)~~

Note: If requesting grant funds that rely on a calculation of the AMHI, Unemployment Rate, or Population Decline then attach the calculation of the weighted average amounts for the project area based on the applicable U.S. Census Bureau geographic areas such as County, Place (City), Census Tract, or Block Group using the ACS data sources described in the IUP. **See Attachment B for US Census Bureau data calculations. See item (B) in Description of Proposed Project for explanation of project benefit area.**

During census data compilation efforts for abridged grant applications, it was noted by SJRA staff that the number of block groups included in each project benefit area did not always necessarily correlate to the same number of rows of census data in the census data spreadsheet provided by TWDB when queries were run to extract only the spreadsheet data related to the block groups for specific project benefit areas. This is not necessarily the case on all projects/grant applications submitted by SJRA, but SJRA wanted to make TWDB aware of this inconsistency.

PRIORITIZATION CRITERIA

<p>Rural Applicant</p> <p>All entities within the project benefit area are (a) outside MSAs and have populations <10,000; or (b) a district or municipality with a service area of 10,000 or less in population; or (c) a county in which no urban area exceeds 50,000 in population.</p>	<p style="text-align: center;"> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No </p> <p style="text-align: center;"> <i>(Please attach a list of all entities in the project benefit area and U.S. Census Bureau 2014-2018 American Community Survey (ACS) 5-year estimates data indicating the population of each area.)</i> </p>
<p>Emergency Need Due to Recent or Imminent Failure or recent Flood-related Disaster Declarations.</p> <p>A need exists for flood hazard mitigation actions to address a clear and imminent threat to public health, safety, and welfare or property due to recent or imminent failure of existing flood infrastructure or flood-related federal or state disaster declarations within the most recent 36 months that would be significantly mitigated by the proposed project.</p>	<p style="text-align: center;"> <input type="checkbox"/> Yes, due to a recent failure. <input type="checkbox"/> Yes, due to imminent failure. <input checked="" type="checkbox"/> Yes, recent flood-related disaster declaration for the proposed project area <input type="checkbox"/> No </p> <p style="text-align: center; color: red;"> Hurricane Harvey (FEMA-4332-DR) and Tropical Storm Imelda (FEMA-4466-DR). See Attachment D and item (E) in Description of Proposed Project. </p>
<p>Distributed Benefits</p> <p>Is the project expected to directly benefit or include the active participation of jurisdictions other than the applicant?</p>	<p style="text-align: center;"> <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No </p> <p style="text-align: center; color: red;"> Potential benefits to multiple entities within the basin. Multiple entities coordinated with as part of application development process, and SJRA anticipates partnering with other entities on project execution. See items (B) and (F) in Description of Proposed Project and Attachment A. </p>

<p>Estimated Completion Date</p> <p>When would all project phases expected to be complete, assuming funds for the project are closed on in Fall of the current year?</p>	<p style="text-align: center;"> <input type="checkbox"/> Within 18 months of closing <input type="checkbox"/> Within 36 months of closing <input checked="" type="checkbox"/> Other </p> <p style="text-align: right; color: red;">48 months. See item (C) in Description of Proposed Project for more information.</p>
<p>Construction Projects Only (Including PAD plus Construction combined)</p> <p>Project is anticipated to result in an integral, reliable, and quantifiable water supply benefit to a specific water user group with an identified need. May include groundwater recharge benefits.</p>	<p style="text-align: center;"> <input checked="" type="checkbox"/> Yes </p> <p style="color: red;">Not a construction project. However, the goal of the study is to identify sedimentation solutions (projects/efforts/practices) in the region, which could in turn result in water supply benefits in Lake Houston. See item (D) in Description of Proposed Project for explanation.</p> <p style="text-align: right;"> <input type="checkbox"/> No </p>
<p>Construction Projects Only (Including PAD plus Construction combined)</p> <p>How many structures are anticipated to be removed from floodplains as a result of the proposed project?</p>	<p>Not a construction project. However, the goal of any sedimentation reduction project/effort/practice resulting or using data from this study would be to restore, maintain, or expand storm flow capacity, which could potentially remove structures from the floodplain. See item (E) in Description of Proposed Project.</p>
<p>Non-structural flood mitigation elements</p> <p>Non-structural flood mitigation elements constitute at least 20 percent of the total project costs.</p>	<p>Percentage of total project costs that are considered nature-based- 0%</p> <p style="color: red;">There is a possibility that future projects/efforts/practices resulting or using data from this study could be partially nature-based/non-structural.</p>

ADDITIONAL INFORMATION FOR THE FLOOD INFORMATION CLEARINGHOUSE COMMITTEE

Responses to questions 1 through 7, along with other information included in this abridged application, will be shared with the Flood Information Clearinghouse Committee (FLICC), a new cooperative effort between the TWDB, General Land Office, Texas Division of Emergency Management, and other state and federal agencies that administer flood mitigation financial assistance programs. After review by the FLICC, the applicant may be advised of other available source(s) of funding.

1. Type of Assistance Requested (Check all that apply):	<input type="checkbox"/> Low Interest Loan <input checked="" type="checkbox"/> Grant <input type="checkbox"/> Loan/Grant Combination <input type="checkbox"/> Local Match for Federal Funding
If requesting funds for the local cost share of a federally funded project, the name of the program:	N/A
2. County(ies) in which the project is located:	This phase of project is a study only. Study area will cover all or parts of following counties: Harris, Montgomery, Grimes, Walker, San Jacinto, Liberty, and Waller. See item (B) in Description of Proposed Project for explanation.
3. (If applicable) Associated FEMA disaster name and number:	Hurricane Harvey (FEMA-4332-DR) and Tropical Storm Imelda (FEMA-4466-DR), see Attachment D
4. Does the applicant have an approved Mitigation Action Plan?	No
5. Is the community to be served by the project in good standing with the National Flood Insurance Program?	Yes, see Attachment E.
6. Will this project involve enlargement of a dam or levee beyond the original footprint of the structure that existed prior to a disaster event?	No
7. Will this project mitigate a repetitive or severe repetitive loss property?	See Attachment D and item (E) in Description of Proposed Project .

CERTIFICATION ON ENFORCING FLOODPLAIN MANAGEMENT STANDARDS

<p>Certification on enforcing floodplain management standards</p> <p>Exception: The only exception is an entity that is requesting FIF funding to fulfill additional requirements for participation in the National Flood Insurance Program. If this is the situation, check here: <input type="checkbox"/></p>	<p>I, _____(Name), serving as _____(Title) hereby certify that _____(Appropriate entity for area to be served by the project) is currently enforcing floodplain management standards at least equivalent to National Flood Insurance Program (NFIP) minimum standards, but it may exceed the NFIP minimum standard.</p> <p>_____ Signature</p> <p>_____ Date</p>

San Jacinto Regional Watershed Master
Drainage Plan Project Fact Sheet

SAN JACINTO REGIONAL WATERSHED MASTER DRAINAGE PLAN FACT SHEET

The San Jacinto Regional Watershed Master Drainage Plan is a comprehensive regional study led by local partners including the Harris County Flood Control District, the San Jacinto River Authority, Montgomery County, and the City of Houston.

This integrated effort, kick started in April 2019, will identify future flood mitigation projects that can be implemented in the near- and long-term to reduce flood risks to people and property throughout the San Jacinto River regional **watershed**.

The goals of the San Jacinto Regional Watershed Master Drainage Plan are to:

- Identify the region’s vulnerabilities to flood hazards using Atlas 14 rainfall
- Develop approaches to enhance public information and flood level assessment capabilities during a flood disaster event
- Evaluate flood mitigation strategies to improve community resilience
- Provide a comprehensive Flood Mitigation Plan that supports the needs and objectives of each regional partner

The goals of the project will be achieved by developing a set of hydrologic and hydraulic models for the major tributaries of the Upper San Jacinto River regional watershed (from the **headwaters** in Walker County to the Interstate 10 crossing at the San Jacinto River in Harris County). The models will use consistent, cohesive methodology and rainfall rates, regardless of the county in which those channels are located.

Information to be developed includes *non-regulatory inundation maps* (not intended to replace current effective maps) for the studied streams that show the extent and depth of **riverine flooding** of the larger rivers within the watershed for an array of simulated storm events. Additionally, information will be gathered about the number of structures, acres of land, properties, and miles of roadway that are located within the modeled floodplains. Study results will be used to inform and update **Hazard Mitigation Plans** for each of the participating partners and to provide guidance on regulations for future growth within the study area.

The project area covers nearly 3,000 square miles. The expected completion time frame is Fall 2020. The project is budgeted at \$2.7 million.

Contact Us

The participating project partners are interested in hearing from you. Please contact your local representative with comments and questions:

- **Harris County Flood Control District** – Jing Chen, jing.chen@hcfcd.hctx.net
- **San Jacinto River Authority** – Matt Barrett; mbarrett@sjra.net
- **Montgomery County** – Darren Hess, darren.hess@mctx.org
- **City of Houston** – Adam Eaton, adam.eaton@houstontx.gov

GLOSSARY

Watershed: A geographical region of land or “drainage area” that drains to a common channel or outlet, mostly creeks and bayous. Drainage of the land can occur directly into a bayou or creek, or through a series of systems that may include storm sewers, roadside ditches, and/or tributary channels.

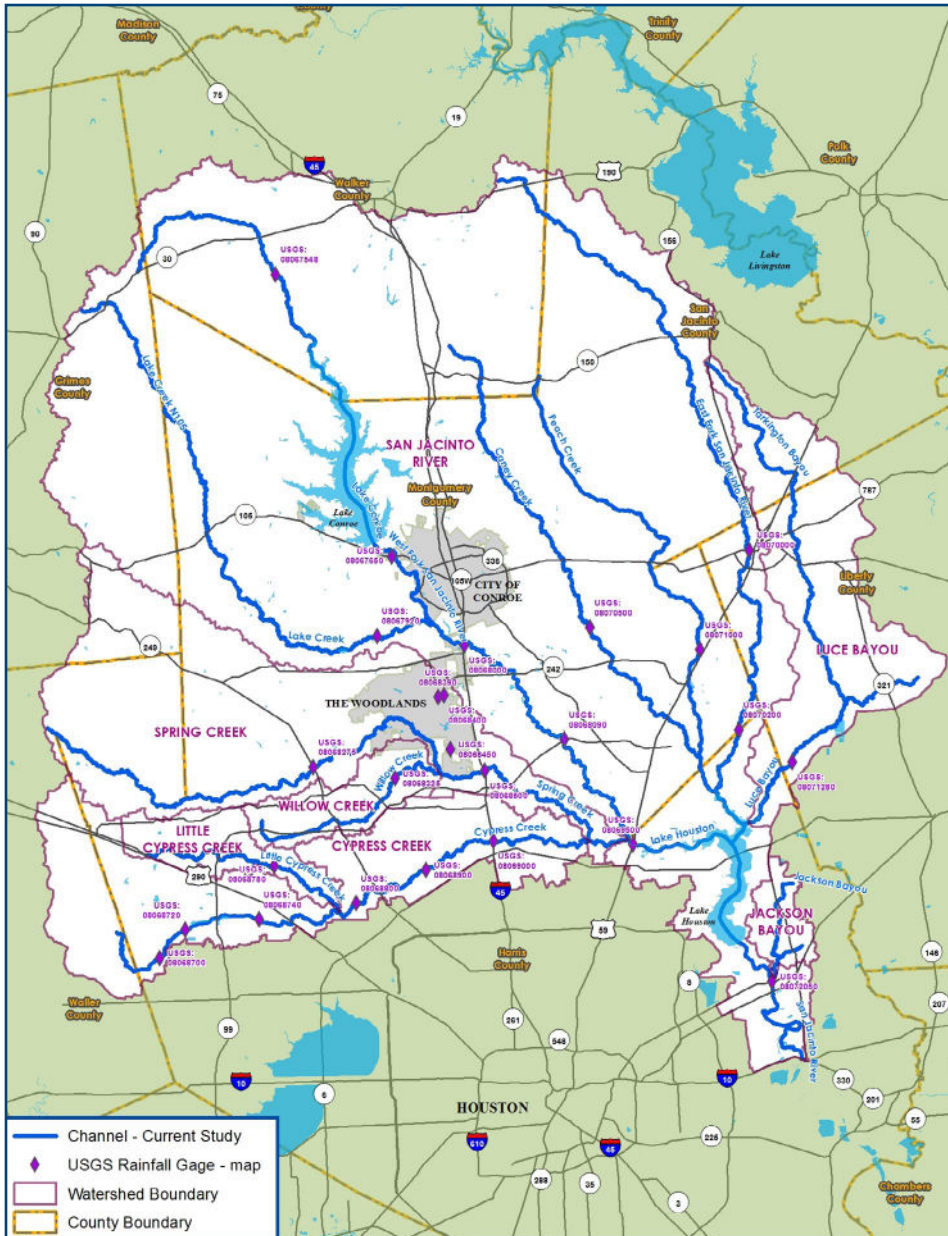

Headwaters: Headwaters are simply the initial source of the water in a river.

Inundation maps: Maps that show where flooding may occur over a range of water levels in a community’s local stream or river.

Riverine flooding: Flooding that is the result of creeks and bayous leaving their banks due to heavy rainfall.

Hazard Mitigation Plans: Hazard mitigation is the effort to reduce loss of life and property by lessening the impact of disasters, such as flooding. Governmental organizations engage in hazard mitigation planning to identify risks and vulnerabilities associated with natural disasters, and develop long-term strategies for protecting people and property. Mitigation plans are key to breaking the cycle of disaster damage, reconstruction, and repeated damage.

SAN JACINTO REGIONAL WATERSHED MASTER DRAINAGE PLAN STUDY AREA

3,000 SQUARE MILES OF STUDY AREA

The watershed for the streams to be studied covers an expanse of nearly 3,000 square miles, located in seven different counties:

- Grimes County
- Harris County
- Liberty County
- Montgomery County
- San Jacinto County
- Walker County
- Waller County

The study includes approximately 535 miles of stream, including West Fork San Jacinto River, East Fork San Jacinto River, San Jacinto River, Lake Creek, Cypress Creek, Little Cypress Creek, Spring Creek, Willow Creek, Caney Creek, Peach Creek, Luce Bayou, Tarkington Bayou, and Jackson Bayou.

Stream Name	Stream Length (Miles)
West Fork San Jacinto River	61.4
East Fork San Jacinto River	73.2
San Jacinto River	16.3
Lake Creek	58.9
Cypress Creek	60.5
Little Cypress Creek	20.8
Spring Creek	69.6
Willow Creek	19.8
Caney Creek	49.3
Peach Creek	53.5
Luce Bayou	10.8
Tarkington Bayou	36.9
Jackson Bayou	4.6
Total	535.6
